PROFESSIONAL SUMMARY

I am a software engineer with proficient experience and expertise in development processes. I have successfully navigated all phases of the development process, including design, construction, and testing. I have worked collaboratively and independently within multifunctional teams to identify and resolve errors and functionality issues. I possess strong technical analysis skills and a deep understanding of development processes.

SKILLS

- ReactJS
- NextJS
- NestJS
- React Native
- NodeJS
- Angular
- Flutter
- Java Spring Boot

EXPERIENCE

SENIOR SOFTWARE ENGINEER Jan 2026 - Current
EPAM Systems, Inc, Remote

- Collaborate within cross-functional, multidisciplinary teams to build, support, and maintain scalable software solutions for a Digital Factory initiative serving international healthcare customers.
- Engage in all stages of the software development lifecycle, including requirements analysis, system design, development, and testing, drawing on 7+ years of full-stack SDLC experience across healthcare and enterprise domains.
- Contribute to the deployment and maintenance of applications, ensuring high-quality performance, reliability, and secure, scalable architecture.
- Participate in code reviews, provide constructive feedback, and implement best practices for software engineering, leveraging strong expertise and advanced proficiency in ReactJS, Next.js, and NestJS.
- Ensure the delivery of solutions aligns with business objectives and user needs, supporting both delivery work and pre-sale/RFP response efforts for client engagements.
- Engage in continuous learning to stay updated with the latest advancements in technology and methodologies, including emerging AI solution engineering and AI agent development practices.
- Contribute to the design and implementation of innovative features to improve user experience and system functionality across web platforms.
- Utilize tools and technologies such as TypeScript, NestJS, Next.js, PostgreSQL, AWS, SQL, REST, Git/Azure DevOps, Snyk, Argo CI/CD, Jest, Cypress, Storybook, React Testing Library, and Redux to optimize workflows and enhance productivity.

SOFTWARE ENGINEER Jan 2021 - Jan 2026
Patagonian, Cali, Colombia

- Led and developed an AI-enhanced telemedicine platform featuring a medical chatbot for pre-diagnosis, prescription requests, clinical studies, online payments, real-time notifications, multi-role dashboards, and a complete admin portal
- Designed, developed, and deployed software to meet business needs.
- Debugged applications to resolve logical and programming issues.
- Implemented Agile principles to track deliverables and boost development productivity successfully.
- Plan and develop multi-platform apps using technologies such as Angular, ReactJS, React Hook Form, React Query, Axios, Cypress, GraphQL, React Testing Library, Storybook, NextJS, React Native, NestJS, NodeJS, Jest, AWS, Flutter, Python, CircleCI, Jenkins, Jira, and Docker according to the guidelines proposed by the company

- Firebase
- ASP.NET core
- PHP
- TypeScript
- AWS
- MySQL
- OracleDB
- PostgreSQL
- Docker
- Codemagic CI/CD
- Azure

SOFTWARE ENGINEER Nov 2022 - Feb 2023
tyba, Remote, Colombia

- Built a multi-platform investment web application for a major Latin American investment group, integrating secure authentication, real-time portfolio data, and financial dashboards.
- Modified and created customized and standard applications in line with software engineering best practices and standards.
- Automated, maintained, and optimized systems and software infrastructure for clients.
- Reviewed software documentation to verify technical accuracy and compliance or completeness.
- Planned and developed multi-platform applications using technologies such as Flutter, NodeJS, Jest, NestJS, Firebase, and AWS according to the guidelines proposed by the company.

FULL STACK DEVELOPER Mar 2021 - Aug 2022
Moove-it, Cali, Colombia

- Led and developed a U.S. healthcare insurance platform, including an admin panel, notification system, transactional portal, and marketing landing page.
- Developed program logic for new applications based on fresh coding or revamped logic from existing applications.
- Applied feedback from code review and implemented changes to meet standards.
- Coded, tested, debugged, documented, and implemented web software applications using technologies such as ReactJS, React Hook Form, React Query, Axios, Cypress, GraphQL, React Testing Library, Storybook, NodeJS, Jest, and AWS.

SOFTWARE ENGINEER Feb 2020 - Apr 2021
Sama Technologies SAS, Remote

- Led and developed a multi-platform application for real-time location-based offers, including a transactional portal, user identity validation, and multi-role experiences
- Debugged applications to resolve logical and programming issues.
- Designed, developed, and deployed software to meet business needs.
- Plan and develop multi-platform mobile applications using technologies such as Flutter, ReactJS, React Hook Form, React Query, Axios, Cypress, GraphQL, React Testing Library, Storybook, NodeJS, Jest, Firebase, and AWS according to the guidelines proposed by the company.

SEMI SR MOBILE DEVELOPER Mar 2020 - Feb 2021
Bess2biz, Remote

- Designed and led the development of an agricultural management app, enabling farmers to organize shifts, yields, crops, and production cycles, with an admin panel, real-time communication, and role-based dashboards.
- Collaborated with cross-functional teams to define, design, and ship new features.

- Performed technical analysis to determine the best ways to meet functional objectives.
- Led the mobile area and coordinated a remote team in the USA, developing together with my development team multi-platform mobile applications (Flutter) that integrate API Rest - NodeJS, Express, MongoDB, and Angular with blockchain and Firebase.

SOFTWARE ENGINEER May 2019 - Feb 2020
Squareball Studios, Cali, Colombia
- Developed a pharmacy connectivity platform used to unify multiple pharmacies, offering services and products to customers through role-based dashboards, an admin panel, and real-time notifications.
- Designed, developed, and deployed software to meet business needs.
- Develop, lead, and implement pertinent and effective systematic solutions to solve problems of great impact for the company, all applied in soft product technologies such as web and administrative mobile applications. Manipulation of crowded databases for sustainability and better performance on high-end platforms using technologies such as Angular, Xamarin, Flutter, ReactJS, Axios, React Testing Library, NodeJS, Jest, ASP.NET CORE, MySQL, and Firebase.

SOFTWARE ANALYST DEVELOPER Dec 2018 - Mar 2019
GTC SAS, Cali, Colombia
- Developed a banking and loan management platform, enabling loan processing, financial reporting, account statements, notifications, file generation, and role-based workflows.
- Integrated, developed, and designed software solutions based on business objectives and requirements.
- Develop and implement relevant and effective systematic solutions to solve problems of great impact for the company, all of this applied in soft product technologies such as accounting and administrative web applications. Manipulation of crowded databases to provide support and better performance on high-level platforms using technologies such as Angular, PL/SQL, OracleDB, Java Spring Boot, ReactJS, Axios, React Testing Library, NodeJS, Jest, and GIT.

EDUCATION

SOFTWARE ENGINEER - COMPUTER SCIENCE Aug 2025
Politécnico Grancolombiano, Palmira

SOFTWARE ANALYST - COMPUTER SCIENCE Oct 2018
Industrial Biotechnology Center – SENA, Palmira
- GPA 4.5
- Graduated with distinction.
- Volunteer, Sennova research and innovation project for the fruit and vegetable trade through a mobile application (SENA - 2018).

SYSTEMS ENGINEER - **COMPUTER SCIENCE** Dec 2016
University - Antonio Jose Camacho, Cali

HIGH SCHOOL DIPLOMA - **COMPUTER SCIENCE** Dec 2014
College Jorge Isaacs, El Cerrito
